

EU Data Act

Prysm:

The Prysm iO device and the Prysm App (collectively, "Prysm") collect data generated during each scan. This includes your scan score and details about your scanning routines and habits, app settings, and preferences.

The connected product generates data only when actively in use. Continuous or real-time data generation is not supported.

Data is currently stored only remotely. Beginning in April 2026, data may be stored on the device for the period of time between when the scan is performed and when the device is next connected to the Prysm App.

Data associated with the device will be retained for the shorter of the following time periods: (1) for so long as an account is active, (2) until deleted at the request of the connected device owner, or (3) ten years. Data may be anonymized and kept for a longer period of time.

Users may request access (or erasure) of their data by following the [Data Subject Rights] [Privacy Center](#) link on our website and in the Prysm App. Users wishing to share their data with a third party can submit such a request through the link mentioned above. Users reaching out through a third party will be asked to verify their request through email by responding to an email once the request has been started by the third party. Failure to reply will result in denial of the request.

Please review the applicable [Privacy Notice](#) and [Terms of Use](#).

The data holder is Nu Skin International, Inc. but your data may be accessed within Nu Skin. This means that we may share your data across the Nu Skin group of companies, which includes our ultimate parent company and its affiliates and subsidiaries. A list of the Nu Skin companies can be found in the Privacy Notice.

Users have the right to lodge a complaint with the competent authority if they believe their rights under these terms have been infringed.

The above terms will remain in effect until modified. Nu Skin reserves the right to update or revise the content of this notice at any time. No update will reduce the rights of Users previously granted.

LumiSpa:

The LumiSpa and WellSpa devices and the Vera App (collectively, "Devices") collect data generated during use. This includes details about the device functions and your routines, habits, app settings, and preferences.

The connected product generates data only when actively in use. Continuous or real-time data generation is not supported.

Device function data (such as battery level) is stored on the device and all other data is stored only remotely.

Data associated with the device will be retained for the shorter of the following time periods: (1) for so long as an account is active, (2) until deleted at the request of the connected device owner, or (3) ten years. Data may be anonymized and kept for a longer period of time.

Users may request access (or erasure) of their data by following the [Data Subject Rights] [[Privacy Center](#)] link on our website and in the Vera App. Users wishing to share their data with a third party can submit such a request through the link mentioned above. Users reaching out through a third party will be asked to verify their request through email by responding to an email once the request has been started by the third party. Failure to reply will result in denial of the request.
